

Amelanchier arborea 'Robin Hill'
Robin Hill downy serviceberry, Robin Hill juneberry

Amelanchier arborea 'Robin Hill' (Robin Hill downy serviceberry) is a tree-forming Amelanchier with a height between 5 and 8 metres and a beautiful, even, ovoid crown. ‘Robin Hill’ was introduced by the Robin Hill Arboretum in Lyndonville, New York in 1970.

The tree blooms rich with light-pink to white flowers in April, right before its leaves sprout. *Amelanchier arborea* 'Robin Hill' bears little fruit, but does have gorgeous autumn colours that go from yellow to orange and red.

The Robin Hill downy serviceberry thrives in moist, slightly acidic, nutrient-rich soil. The tree will tolerate some shade, but for the richest blooms, direct sunlight is preferable. As a standard tree, the Robin Hill with its growth habit and limited fruit production is suitable for (narrow) streets, squares and car parks with a large drip line. As a multi-stem tree, it will be an eye-catcher in gardens and parks.

TYPES OF PLANTING

Tree types: standard trees, multi-stemmed trees | **Topiary on stem**: multi-stem umbrella

USE

Location: avenue, car park / parking lot, park, central reservation, in containers, roof garden, large garden, small garden, patio, cemetery, traffic areas, industrial zones, countryside, ecological zone | **Pavement**: none, open | **Planting concepts**: Eco planting

CHARACTERISTICS

Crown shape: ovoid | **Crown structure**: semi-open | **Height**: 5 - 8 m | **Width**: 3 - 4 m | **Winter hardiness zone**: 5A - 9A

ASPECTS

Wind: tolerant to wind | **Soil**: loess, sabulous clay, heavy clay, light clay, loamy soil | **Nutrient level**: moderately rich in nutrients, rich in nutrients | **Soil moisture level**: moist | **Light requirements**: sun | **pH range**: acidic, neutral (5.6 - 7.5) | **Host plant/forage plant**: bees, butterflies, birds | **Extreme environments**: tolerant to salt spray

PLANTKENMERKEN

Flowers: raceme, star-shaped, striking, standing, singular | **Flower colour**: white-pink | **Flowering period**: April - April | **Leaf colour**: buds bronze, green, underside grey-green | **Leaves**: deciduous, ovoid, slightly hairy, serrate | **Autumn colour**: yellow-orange, orange-red | **Fruits**: edible, small, frosty, aromatic, raceme, berry | **Fruit colour**: blue-violet | **Bark colour**: grey-brown | **Bark**: smooth | **Twig colour**: grey-brown | **Twigs**: bare, finely branched | **Root system**: shallow, extensive, slightly branched
